

DEPARTMENT OF CIVIL ENGINEERING BIMONTHLY NEWS LETTER

Volume: 1 Issue:1

Date: September 2021

FROM THE DESK OF HOD

It gives me immense pleasure to present the forthcoming issue of the departmental newsletter “**DHWANI**” as a forerunner of department activities. The department strives to impart civil knowledge and training of the highest standards. We believe that our students have been well accepted in their job profiles and have consistently exceeded expectations of the dynamic corporate world.

I stand awed by the sheer number of contents that have come pouring in for the newsletter. This shows the positive and creative energy of faculty members and students present in the college

My sincere appreciation goes out for the editorial team for their strenuous and sincere efforts towards putting together the myriad thoughts and dreams of our students and faculties into a meaningful and delightful visual fest. Also I invite the readers of ‘DHWANI’ for their contribution and suggestions for the further issues.

VISION

To impart excellence in the field of Civil Engineering and transform the students into technically competent and socially committed professionals who serve the industry and contribute to the development and welfare of the society.

MISSION

- To create proficient Civil Engineers who apply their technical, managerial and practical skills to discover real time solutions to regional and global problems by accepting new challenges and projects.
- To provide a suitable teaching learning environment with emerging technologies that meet the requirements of the industry
- To mentor students on concepts related to growth, development and sustainability and instil moral and ethical values.

THE NAME DHWANI

The word Dhvani generally means music, melody or sound. When it comes to the Department of Civil Engineering Dhvani is our newsletter, Dhvani is the eternal sound of our Department showcasing it's Academic , Social & Cultural involvement of the students as well as faculties.

SARATH D
STAFF EDITOR

As we know a person who gets appreciated for his work and achievements will cherish them and excel further. We the Department of Civil Engineering believe that this small appreciation can motivate our students as well as our staffs to do better.

Being a Civil engineer we cannot simply put the name as it is. We desire that the Name itself should showcase the pride of Civil engineering profession. So each letter of DHWANI is designed in such a way that letter D in the shape of a Dam, H in the shape of a hanging bridge, W in the shape of a surveying instrument with two levelling staffs, A in the shape of a pyramid, N is in the shape of a Railway crossing and I in the shape of a road.

STAFF DEVELOPMENT PROGRAM

Our faculty Mr. Anoop P P had an active participation in the Web E-Talks on “Recent advancements in displacement based seismic design of bridges” and “An overview of need and adoption of wind tunnel testing for long span bridges”

FAREWELL

Fare well to our most beloved **Risvana P K**, Lecturer in Civil Engineering, who was transferred to KGPT Kozhikode. She always had a pleasant smile on the face day in and out and was an absolute bundle of joy.

We also had to bid adieu to **Aneesh K K**, Tradesman Civil Engineering, who got promoted to the post of Trade Instructor and joined GEC, Kannur. Hearty congratulations to him for getting the well deserved promotion. But the gap left behind in the department by the departure of Aneesh Sir will always remain.

Department wishes both of them all the success in life and will always cherish the memories.
